JAGUAR SPOT

Chip Management Solution

INNOVATIVE TIMING SYSTEMS®

Jaguar SPOT is a complete solution for managing your timing chips, including programming, verifying, and using as a chip check station. It consists of a small RFID reader with a built-in antenna and standalone software. The reader operates from the USB 3.0 or 3.1 port on your Windows 10 computer (tablet, laptop, or desktop), so you no longer need to set up your Jaguar timing system and antenna to program chips or to perform chip check!

**$799.**^{00}

FEATURES:

- Allows you to program your Jaguar timing chips, incredibly fast – at speeds up to 1,800 per hour.
- Contains full Chip Check functions including the ability to load a Jaguar database in advance. Includes a
- Bulk Verify tool to test a box of bibs in less than 10 seconds.
- Can save the Jaguar database after Chip Check with the check-in times stored in Split 10.
- Integrates with ITS YOUR RACE automatically to look up last minute registrations.
- Can operate completely on battery power from the tablet or laptop.
- You can use up to 8 Jaguar SPOT readers in the same area for packet pickup or chip check operations.
- Designed to be extremely easy for your volunteers and B team to use.
- Lightweight and small – only 2.25 x 5.25 inches.
